

augMENTOR

Augmented Intelligence for Training and Education

The augMENTOR project is developing a pedagogical framework that leverages emerging technologies and integrates them in education and training, through an open-access AI-boosted toolkit aiming to accelerate skills development.

It will deploy personalised learning profiles that consider students' personal characteristics, needs and preferences, ultimately addressing underlying educational difficulties and enabling students to reach their full potential.

TARGET GROUPS

Education professionals, pedagogical societies

Technology-enhanced learning and MOOC platforms developers and providers

Educational leaders and policy makers, educational agencies and regulatory bodies

Start-up community with commercialization interest on augMENTOR products and services

PILOTS

augMENTOR will be deployed and tested in four real-life pilots representing diverse educational and training settings.

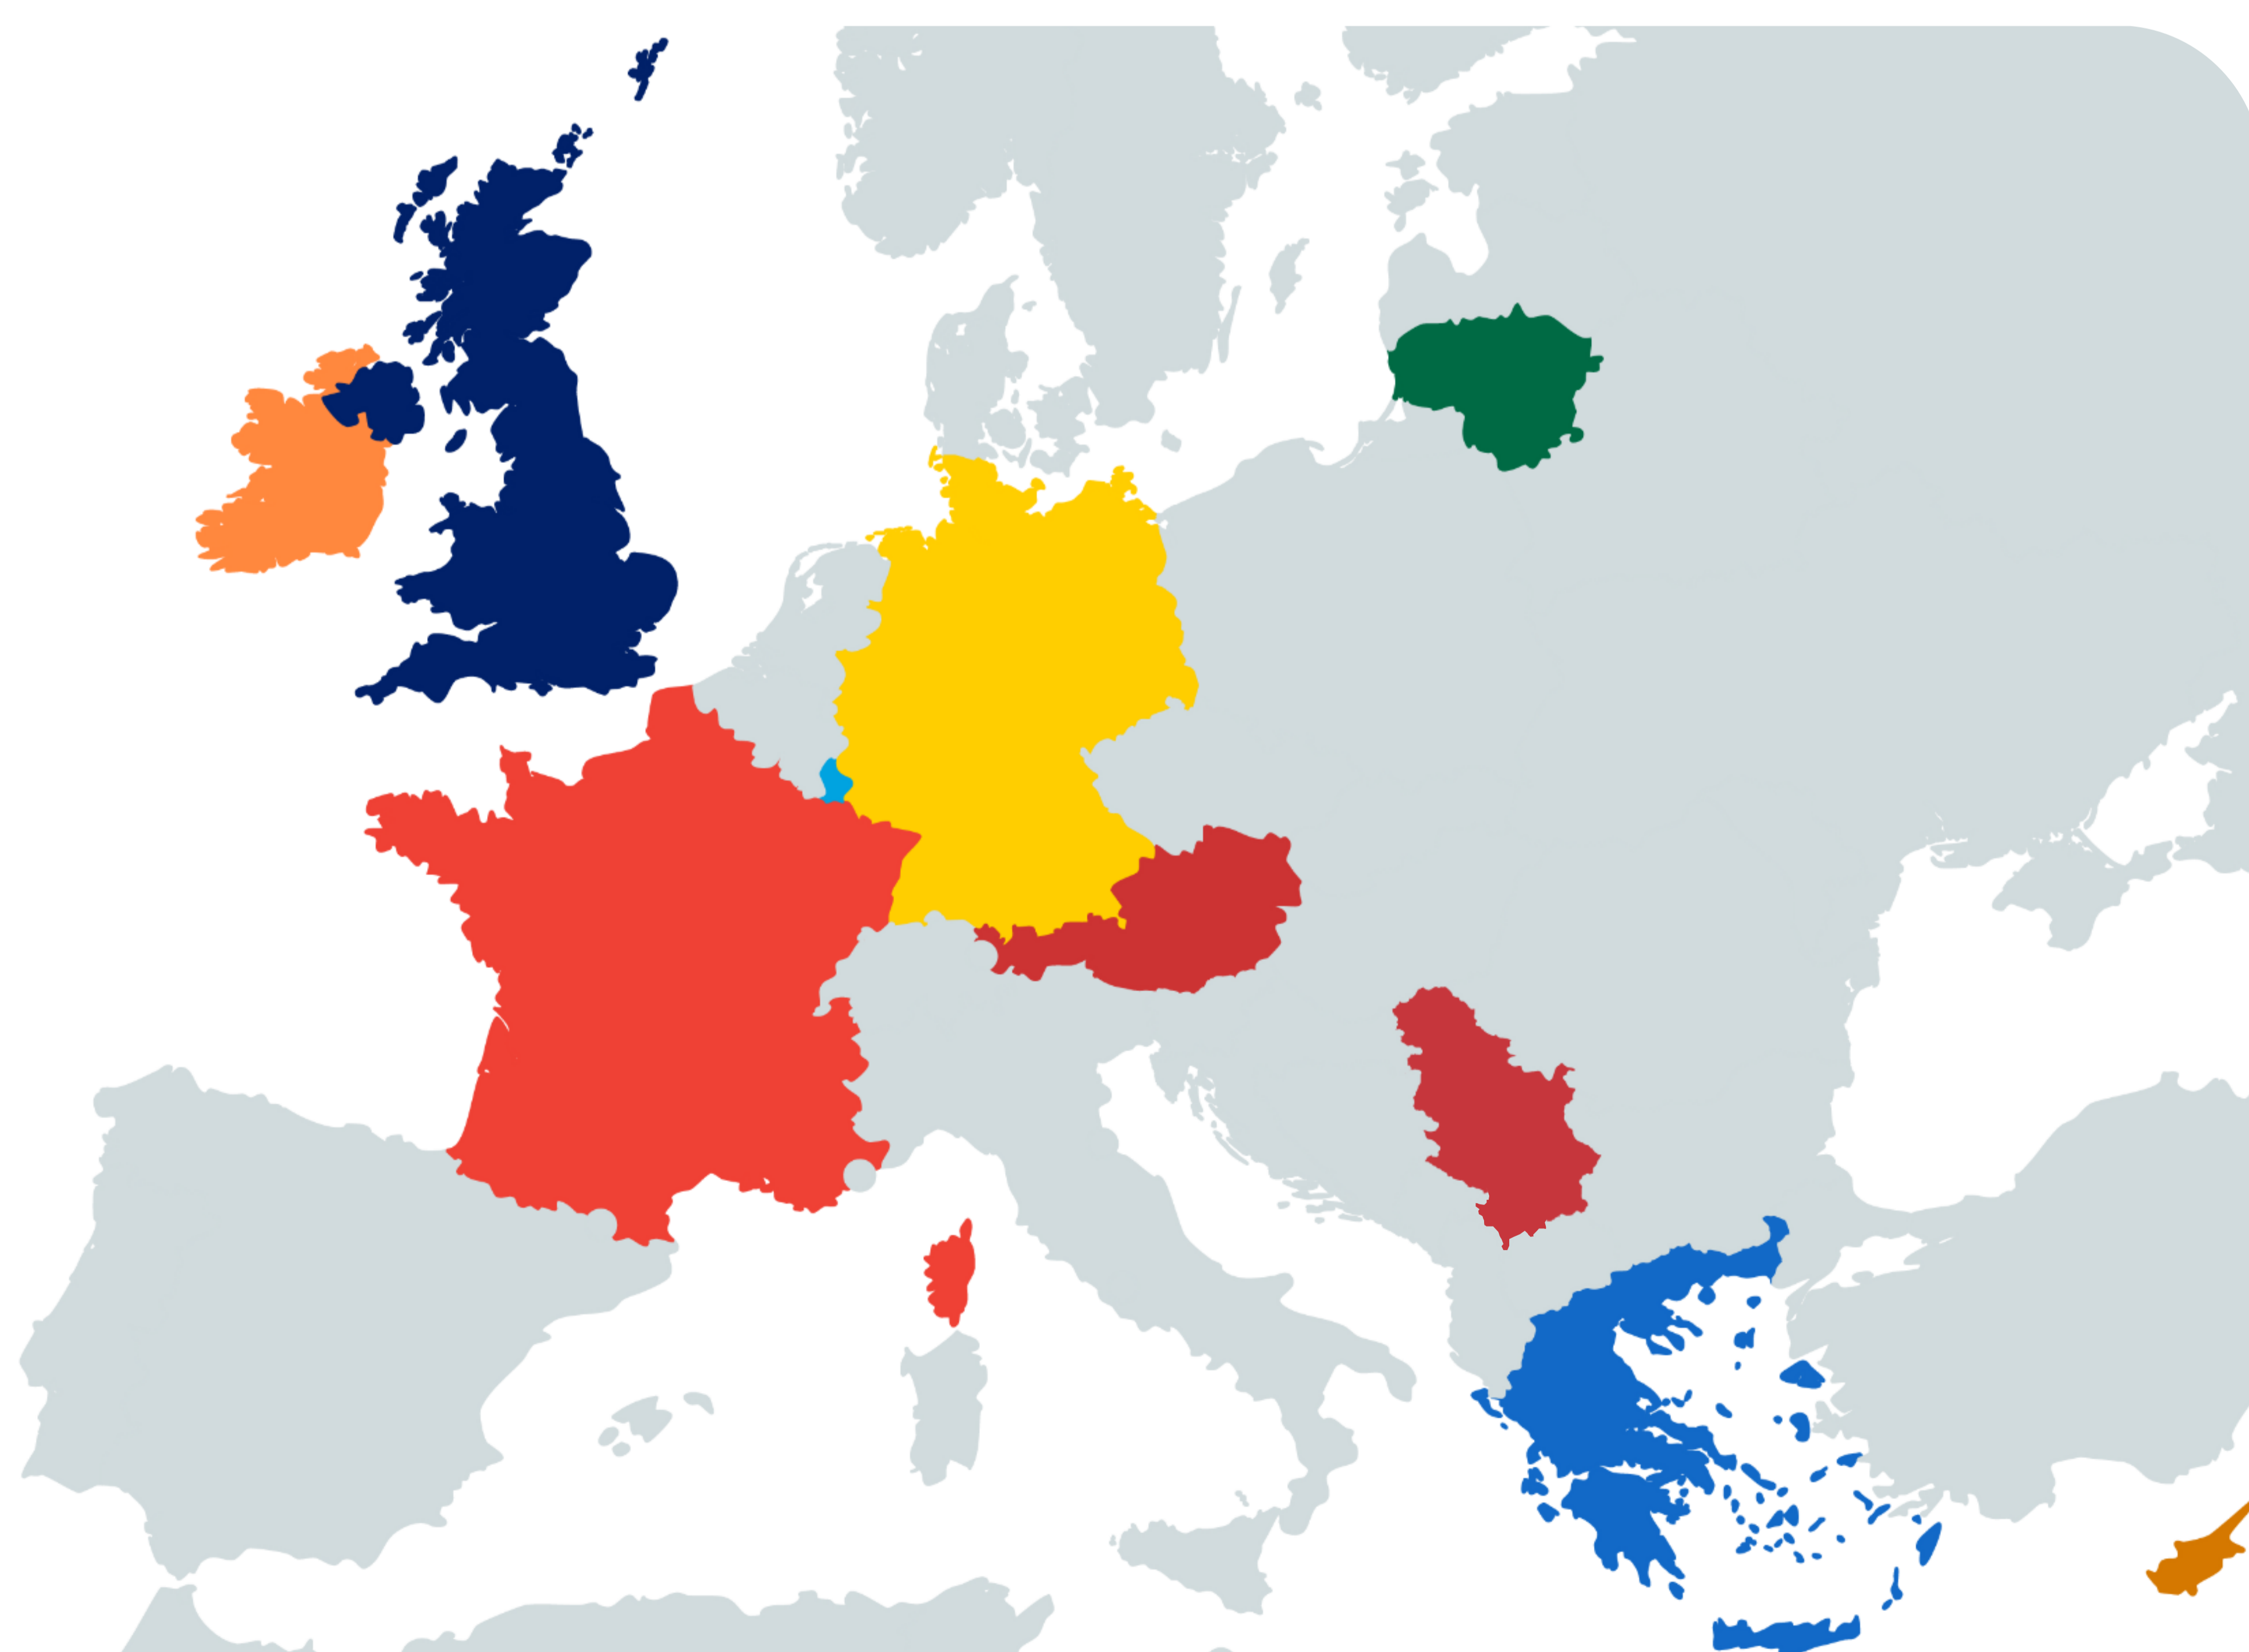

#1: Emerging technologies in Adult Education and Life-Long Learning settings

#2: Innovative Training Programmes for Pre-service Teachers

#3: STEAM-based Programs for Environmental Education in a Network of Eco-schools

#4: Leapfrogging Industry 4.0 technologies for Civic Society watchdogs and EU Civilian Missions

CONSORTIUM

The augMENTOR project (GA No. 101061509) is funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. The European Union cannot be held responsible for them.
